

Run the code by typing into the terminal in which the file is open in

*** python3 stitch_images.py

Keypoint Detection – Completed

Keypoint Matching – Completed

Plotting Matching Keypoints – Completed

- It does take a while to run, roughly 2 minutes, so I made it so it prints the matching indices and once you see the x-coord is at around 2440 then it will display the keypoint matches on the 2 images

Estimated Affine and Projective Transformation Matrix – Completed

- In the terminal, it will display the Affine and Projective Matrices

RANSAC and Image Stitching – Incomplete

- I was unable to get this done
